Information Security & Data Protection Guide

Document Type: Employee Security Awareness Guide
Version: 1.0
Department: Information Security
Classification: Internal Use Only
Effective Date: October 2026

1. Purpose

The purpose of this guide is to introduce employees to the fundamental security practices required to protect company systems, data, applications, and digital assets. Every employee plays a critical role in maintaining a secure and compliant workplace environment.

2. Employee Responsibilities

All employees are expected to:

- Protect company information and technology resources.
- Follow approved security procedures and policies.
- Report suspicious activities immediately.
- Maintain confidentiality of sensitive information.
- Use company systems responsibly and ethically.

Failure to comply with security requirements may result in disciplinary action in accordance with company policies.

3. Password & Account Security

Password Requirements

Employees must create strong passwords that:

- Contain at least 12 characters.
- Include uppercase and lowercase letters.
- Include numbers and special characters.
- Are unique for every account.

Employees Must Not

- Share passwords with anyone.
- Reuse passwords across multiple platforms.
- Save passwords in unsecured locations.

Example of a Strong Password

```
OnboardX@2026Secure
```

4. Multi-Factor Authentication (MFA)

Multi-Factor Authentication (MFA) provides an additional layer of protection beyond passwords.

Benefits

- Reduces unauthorized access risks.
- Protects sensitive company information.
- Improves overall account security.

Employees should approve MFA requests only when they initiate a login attempt.

5. Email & Phishing Awareness

Phishing attacks are one of the most common security threats.

Before interacting with any message:

- Verify the sender's email address.
- Inspect links before clicking.
- Avoid opening unexpected attachments.
- Report suspicious messages immediately.

Never

- Share passwords through email.
- Provide confidential information without verification.
- Download unknown files.

6. Device Security

Company devices must be protected at all times.

Employees should:

- Lock devices when leaving their workspace.
- Keep operating systems updated.
- Install only approved applications.
- Use antivirus and endpoint protection tools.
- Secure devices while working remotely.

7. Data Privacy & Confidentiality

Confidential information may include:

- Employee records
- Customer information
- Internal project documentation
- Financial information

- Business strategies

Employees must access information strictly on a need-to-know basis and handle all company information responsibly.

8. Acceptable Use of Company Resources

Company systems and resources should be used only for legitimate business purposes.

Employees should avoid:

- Downloading unauthorized software.
- Accessing malicious or unsafe websites.
- Sharing company credentials.
- Installing unapproved applications.

9. Reporting Security Incidents

Immediately report:

- Suspicious emails
- Lost or stolen devices
- Unauthorized access attempts
- Malware infections
- Data exposure incidents

Timely reporting helps reduce risk and protect company assets.

10. Security Best Practices

All employees are encouraged to:

✅ Use strong passwords

✅ Enable MFA whenever available

- ✅ Verify emails before clicking links
- ✅ Lock devices when unattended
- ✅ Keep software updated
- ✅ Protect confidential information
- ✅ Report suspicious activities immediately

Employee Acknowledgement

I acknowledge that I have reviewed and understood the Information Security & Data Protection Guide. I agree to follow the security practices and responsibilities outlined in this document while using company resources and systems.
